

## **Terry Thompson, Bio**

Terry is the founder and CEO of TTE Transcripts Worldwide, a leader in the rapidly growing transcription and translation industry and a certified woman-owned business. The company was founded in 1986 as a one-woman transcription firm that served the audio publishing industry, where Terry got her start. Fueled by client referrals and Terry's early recognition that economic globalization would produce a growing demand for translation and foreign-language transcription, the business grew dramatically and expanded its service offerings. TTE is now a half-million dollar business which serves Fortune 500 corporations, government agencies, and a wide range of companies in the service sector.

Thompson's vision for the evolving industry landscape led to the 2012 release of the mobile transcription service application IdeaScribe®, which marked another evolution for TTE. This app for the iPhone, iPad, and iPod Touch makes it possible for anyone—from a CEO in a cross-town cab to the crime scene investigator behind the yellow tape—to capture important audio on the go, and upload it for transcription at the push of a button.

Terry is an active member of eWomanNetwork and NAWBO, as well as a dedicated volunteer. In 2008, she traveled to Ecuador with eWomanNetwork and CARE to help women in that region get started in business. Under her leadership, TTE supports a number of charitable causes at both the local and national levels. TTE is a member of the Huntley Chamber of Commerce.
